

## Aerial Work Platforms

Aerial Work Platforms - There are numerous accessories utilized for forklifts which could be used to be able to help expand the capabilities of your forklift and allow you to carry objects, handle materials with less effort or to finish clean-up jobs.

Several of the accessories are specially designed in order to fit on the blades themselves. Blade extensions for example, are utilized when you need a lot more fork length, that increases lifting capacity. Fork extensions come in lengths varying from 48-120 inches. Rounded or triangular accessories are another kind used whenever transferring rolled material in order to make sure it does not roll off of the traditional flat forks.

Lifting attachments could be pivoting and telescoping crane accessories. They come in numerous styles. These attachments are normally utilized for moving poles, lumber, metal bars or any sort of bulky stuff. Additional accessories like for instance different kinds of hooks and hook plates are presented to carry things utilizing a chain or sling. Magnetic lifters and slab lifters are other objects which can be used together with hook accessories. Slab lifters are specialized attachments which are utilized for picking up different materials which are delivered in a sheet or slab format. Rug rams or carpet poles are other lifting tools that connect to your forklift to make transporting rolls of carpet much easier. The accessory hooks onto the lift truck's forks and has a pole that goes through the center of the carpet roll.

There are several other types of forklift attachments which can be designed for facility maintenance like for instance snow forks. These forks connect to front end loaders and could transfer materials such as snow, dirt and soil. Other popular cleanup accessories comprise magnetic sweepers and standard sweepers. Standard sweepers includes a broom which the lift truck blades connect onto for sweeping large spaces like parking lots or warehouse and factory floors. The magnetic sweeper is the same except that it has a magnetic plate instead of bristles. The magnetic sweeper is utilized in areas where there is lots of metal fragments such as on shop floors for instance. Sweepers have widths up to sixty inches and this surface area makes clean up easy and fast.

A material spreader is another lift truck attachment that is normally utilized at facilities. These spreaders are helpful for various applications such as spreading seeds, ice melt, rock salt, pellets, fertilizers and insecticides.

Work platforms are another optional lifting attachment which a lot of businesses use day by day. The platforms range in size from 36" x 36" to up to 60" x 60". There are a few models available that are capable of folding up and storing into a smaller space. Work platforms are designed to raise workers up to an overhead location with the use of the lift truck. Larger platform models have extra space for staff to bring tools and other essential things meant for the job. Usually work platforms are made of steel or ploy material.
