

Meritor Part

Meritor Parts - Meritor is a leading international supplier which is proudly built on a one hundred year tradition of service and quality. They concentrate on various integrated systems, modules and components to original equipment makers and the aftermarket for the transportation and industrial trades.

Meritor values the wishes of their customers to ensure their success while priding itself in the company's unique energy and believes this output of energy to be their aggressive advantage in their global operations. Meritor begins with a culture that values diversity of individuals and their broad thought processes. Operating in 19 nations and hiring more than 11,200 people, Meritor encourages innovation and collaboration amongst a team of knowledgeable experts.

By just employing future focused workers, Meritor strongly feels these top-caliber individuals will be able to quickly adapt to changing environments and exhibit the performance and commitment required so as to reach results in the competitive materials handling market. The company empowers their teams to make sound business decisions to be able to enhance the overall success of the company. In return, Meritor offers all of their workers various opportunities for professional and personal development.

The Advanced Engineering team is on the forefront of components and system engineering. This comprises drivelines, axles, suspension and braking systems meant for heavy duty and medium trucks, trailers, off-highway vehicles, buses and military vehicles. The Meritor Advanced Engineering team is developing. They opened a new technical center in Bangalore, India in September 2009 so as to lead their advanced product development initiatives which represent the whole Asia Pacific region. This particular team is also responsible for supporting the requirements of all their international engineering employees.

The Quality team at Meritor is a dynamic and customer-focused group which is devoted to ensuring optimum growth at their production plants and aftermarket distribution facilities that are situated on 5 continents and in 19 nations.

The supplier development network is particularly situated to be able to support new business development. Regional teams are supported by international centralized specialties, initiatives and quality systems in Materials Engineering and Six Sigma. Meritor's growing Six Sigma program promotes a data-driven, fact-based approach to decision making in each and every aspect of the company. The DFSS or Design for Six Sigma ensures product reliability within each and every region. The team is even included transactional Green Belts who utilize Six Sigma tools to business methods and apply lean techniques.
