

Drum Clamps

Drum Clamps - Forklifts are meant to deal with lifting, storing and moving pallets. For companies that deal with products inside drums, you have to utilize an attachment to store, move and lift them. There are numerous drum forklift attachments that you could get for all of your drum storing and moving requirements. These attachments are particularly designed so as to handle drum containers - therefore there is no risk of damage to the product or drum container whenever they are lifted, stored or moved.

Drum Positioner And Grab

The drum positioner could be utilized in order to load and unload drums off of racks, drum stands and vehicles. These are presented in three or four tine models. This attachment is fully mechanical, hence allowing the operator to operate all from the comfort of the lift truck seat. Able to move large and extra large plastic drums, steel, its capacity is 210 liters. This particular attachment is utilized for drum pyramid stacking.

The drum grab is fork mounted and is designed with the sole objective of handling steel drums which have rolling hoops. Even though the purpose for the design was to handle steel drums with rolling hoops, the drum grab can accommodate the transporting of large and extra large plastic drums. Drum capacity maximum is 210 liters for steel drums with rolling hoops and 220 liters for plastic drums.

The Rotator

The drum rotator is another lift truck accessory that mounts onto the forks themselves. Their objective is to lift the drum and turn it upside down. The drum is clasped into the drum rotator utilizing a clamp which fits around the center of the drum. The rotation is executed by either a crank handle or a continuous loop chain. The crank handle is intended for operations that take place beneath shoulder level. For operations which should happen above shoulder level, the continual loop chain will be used.

Drum tines are straightforward fork mounted accessory that can be designed for stacking and unstacking 210-liter metal drums. Stacking requires nothing elaborate, just simple horizontal placement of the drums. The carriage-mounted accessories reduce the load center of the drums.

Automatic Tongs

Drum tongs are obtainable both semi-automatic and automatic units which could be utilized in the open topped and tight head metal drum kinds. The drum tongs can likewise be attached several various ways to the lift truck. One method is to attach them under a fork-mounted hook. One more way is to attach them to a fork-mounted jib or a carriage mounted jib. Both the automatic and semi-automatic have a drum capacity of 210 liters. With the automatic, there is no requirement for the individual operating it to ever leave the seat of the lift truck.

Rim Grip Handler

When drums need storage with inadequate area available, the Rim Grip Drum Handler is the perfect alternative in drum forklift attachments. This particular attachment will work for either the two hundred ten liter drums along with one hundred twenty liter drums. The Rim Grip Handler operates by utilizing metal jaws to grab the edge of the drum. It lifts the drum and puts it down without requiring any space between all the drums. The typical model utilized in the business is a zinc-plated handler, though, this attachment comes obtainable in stainless steel for the food and drink market.
